THE NOPALES FAMILY

Why the Nopales Family? Every single square meter leather, made out of Nopales Cactus, instead of animal skin, helps significantly to Heal the World.

Every Nopales NFT or Token (NOPE) can help to speed up the process.

ABOUT:

Phase I: 01/2020
Our Humble Beginnings
In January 2020 we started our Finca Garden project with roughly 100 Nopales Cactus mother plants.

Phase II: 08/2022

Nopales goes Crypto

Since August 2022 the first NFT collection NFT "Nopales goes Art" was released. You can get Nopales NFT now on OpenSea.io (Link: OpenSea.io/FincaGarden).

Phase III: Autumn 2022
Transition to Full Service
The sale of Nopales Leafs (real plants to grow) started @ finca.garden.

Phase IV: 2023
Swap NOPALES Token
Swap Nopales (NOPE) @ PancakeSwap

Investors Plan

The NOPALES Token (NOPE)

Total supply: 639,000,000,000 NOPE
Token Issue Date: 2022-11-01 02:03:21 pm
Name: NOPALES
Symbol: NOPE
Type: BSC
Decimals: 18
Contract address: 0x501261CC3571962E21BD5E445cE2e9B58e334EA1
Link: https://bscscan.com/token/0x501261cc3571962e21bd5e445ce2e9b58e334ea1
Verified Ownership: YES

Blockchain: BSCSCAN
Link: https://bscscan.com/token/0x501261cc3571962e21bd5e445ce2e9b58e334ea1

Whitepaper: YES
Link WHITEPAPER: https://nopales.io/whitepaper.pdf

Crypto Exchanges Listing for Token trading: 2023
Available on PanCakeSwap

Owner Privileges:
Owner can not mint new tokens
Owner can not pause trading.
Owner can not set max transaction limit lower than 0.1% of circulating supply.
Owner can not block accounts from trading. (Blacklist etc.)
Owner can not claim the contract's balance of its own token.
Owner can not set max wallet limit lower than 1% of circulating supply.
Anything that can be changed by the owner can not limit or stop trading for the investors. (Anti-bot without time limit, Transaction time lock without limit, sell limit based on holder balance, etc.)

Tokenomic:
Taxes never exceed a total of 17% for buy and sell added together
No unlock tokens in first 30 days from listing
Liquidity lockup time: 369 days
Liquidity percent: 66%
Private sale bonus: 10% from presale rate
Listing rate equal to presale rate
SAFU developer controls unlock tokens
SAFU developer confirms if the project had a private sale. If there was a real private sale, SAFU developer will distribute tokens for private sale investors.
No airdrop tokens in first 30 days from listing (No giveaways, contest tokens)

Contract:

SAFU Badge: Yes
Contract audited by a trusted partner (BSC)
Buybacks: automated
Burns: automated
Auto liquidity address: 0x0000000000000000000000000000000000000000
Contract should not malfunction in any circumstances
No proxy contracts
Common Problems That Cause Contracts to Crash:
Failed transactions that are caused by mathematical errors
Swap settings and parameters are always in a safe range
BNB transfers from the contract are not revert in any circumstances

VISION

Help to save billions of animals from an agonizing life and death, and incidentally help to reduce climate-damaging methane and N2O (nitrous oxide) levels.

For shoes, handbags and clothing made of leather, more than a billion animals are killed in

agony every year. The environment, the workers and our health also suffer enormously from the toxic chemicals used in tanning so that the animal skins do not decay.

INDUSTRIAL USE:

Nopales cactus grows outstanding in the Mediterranean area and can be easily cultivated by European micro farmers in the front or main garden. The succulent needs almost no attention and care. Advantage for small farmers: Plagues spread less quickly. Monocultures largely prevented. Stable income possible for hundreds of thousands or even millions of

people. Mother plants are already available for little money. Up to 6 harvests per year are possible.

Why Nopales?

In its country of origin, Mexico, the prickly pear is an important cultivated plant and is even depicted in the coat of arms on the national flag. It has few thorns and grows up to 7 metres high and 50 years old in dry regions.

The versatile and low-maintenance opuntia is not only used as a vegetable or natural medicine, but also in leather production as a sustainable animal skin alternative. Cactus leather is considered very soft, breathable and durable. It is used in just as many ways as real leather. Today, the Nopales cactus is also native to Australia, South Africa and the Mediterranean region.

LOCATION:

The robust succulent feels most at home in sunny places and sandy soils.

TREATMENT:

Although the Nopales cactus can survive longer dry periods without any problems, it grows best when watered sparingly. It does not require any special care. Therefore, the cultivation of prickly pear cactus is especially interesting for European hobby gardeners and small farmers, especially since the sale of the harvest even creates a monthly income.

PROFILE:

The ears (called nopalitos) can be harvested all year round. The fibre-rich plant stimulates digestion. The Aztec civilisation already knew that the nopal cactus is rich in valuable substances such as pectin, proteins, amino acids, silicon, manganese, iron, calcium and vitamins. Therefore, it is not surprising that in Mexico alone, over 110 basic nopales recipes have been counted.

The vitamin C-rich fig fruits are best picked in autumn and, in contrast to their leafy green companions, they are already an integral part of European supermarkets.

GOOD TO KNOW:

For shoes, handbags and clothing made of leather, more than a billion animals are killed in agony every year. The environment, the workers and our health also suffer enormously from the toxic chemicals used in tanning so that the animal skins do not decay. The use of Nopales Cactus instead of animal skin can stop this cruelty and help the climate.

Summary:

1. Nopales cactus grows outstanding in the Mediterranean area and can be easily cultivated by European micro farmers in the front or main garden.

2. The succulent needs almost no attention and care. Advantage for small farmers: Plagues spread less quickly. Monocultures largely prevented.

3. Stable income possible for hundreds of thousands or even millions of people.

4. Mother plants are already available for little money. Several harvests per year are possible.

5. Minting Nopales NFTs & Trading Nopales Token (NOPE) can help to speed up the process in establishing Nopales Cactus fields for leather production
